

## **Droplet Computing Announced as a Finalist in the UK IT Industry Awards in Specialist Vendor of the Year Category**

*BCS and Computing Recognize Droplet Computing For The Third Year Running*

**LONDON, UK – September 15, 2020** – [Droplet Computing](#) today announced they are a finalist in the UK IT Industry Awards. The BCS and Computing UK IT Industry Awards are a platform for the entire profession to celebrate best practice, innovation and excellence.

Paul Fletcher, Group CEO, BCS, The Chartered Institute for IT, commented, “Congratulations to Droplet Computing for being shortlisted, they clearly demonstrate the highest levels of excellence and innovation across today’s IT sector. These awards showcase some of the most inspiring and best in our industry, and it is a significant achievement to be shortlisted.”

This is the third year in a row Droplet Computing has reached finalist stage. In 2018 they won the UK Innovation and Entrepreneurship award and in 2019 they won the Emerging Technology of the Year award.

Stuart Sumner, Editorial Director, Computing, said “Being shortlisted for the UK IT Industry Awards is a massive achievement, as it means that the individual, team, organization or product is among the best in its field. The unique, rigorous and independent judging process sets these awards apart, and mean that only the finest submissions are able to progress to the face to face judging rounds.”

The awards ceremony this year will be held virtually on Wednesday, November 11. Good luck to all the finalists!

### **About Droplet Computing**

Droplet Computing is redefining application delivery with its patent-pending application container technology, enabling applications to be delivered on any device. Today’s businesses are under pressure to transform and update but are being held back by applications - from legacy up to current versions. Droplet Computing decouples applications from the OS for online and offline use and delivers significant business value by providing costs savings, increasing user productivity and so much more.
